Education

Bachelor of Engineering in Information Science & Engineering

Aug 2022 – Jun 2026

B.M.S College of Engineering, VTU – Bengaluru

- Expected Graduation: July 2026
- Cumulative GPA: 8.23/10.0
- **Relevant Coursework:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Networks, Software Engineering, Machine Learning
- **Extracurriculars:** Vocalist, Guitarist, Football

12th Grade (Karnataka State Board) – 90%

Apr 2021 – Jun 2022

10th Grade (CBSE Board) – 90%

2019 – 2020

Projects

TapCart: NFC-Based Smart Retail System

- Designed an IoT-integrated retail platform enabling “tap-to-shop” purchases using a smartphone to scan NFC tags embedded in each product, with real-time inventory sync across devices.
- **Tech Stack:** NFC, IoT, React, React Native, Node.js, Express.js, Cloud APIs, Payment APIs

NCERT RAG Bot: AI-Powered NCERT Tutor

- Built an intelligent AI tutor using a Retrieval-Augmented Generation (RAG) pipeline to enable conversational Q&A from NCERT Class 10 PDFs with local LLM integration, smart text chunking, vector search, and memory-based context retention.
- **Tech Stack:** Python, Streamlit, Ollama (phi3-fast), Chroma Vector DB, LangChain, PyPDF, FAISS

Instant Canteen: Smart Campus Food Ordering & Payment System

- Built a full-stack web application that streamlines campus canteen operations by enabling students to pre-order meals and make instant UPI-based QR payments, while providing vendors with a real-time dashboard to manage menus, track orders, and optimize peak-hour efficiency.
- **Tech Stack:** React, TypeScript, Tailwind CSS, Vite, Supabase, Netlify

AI-Based Music Recommendation System

- Developed a Python-based GUI app that recommends songs using ChatGPT with Spotify and YouTube Music API integrations for real-time mood-based suggestions.
- **Tech Stack:** Python, Tkinter, OpenAI API, Spotify API, YouTube Music API

COVID-19 Genome Mutation Visualization Tool

- Built a visualization tool to compare genome sequences of COVID-19 variants and visualize protein structure mutations via ChimeraX.
- **Tech Stack:** Python, Biopython, ChimeraX, Matplotlib, Phylogenetic Visualization

Research Papers

TapCart: NFC-Based Payment Interface

Apr 2025

- Proposed secure NFC-based merchant payment architecture for contactless transactions without extra hardware.

Technical Skills

Languages: C++, Python, C, Java, JavaScript, HTML/CSS

Frameworks & Tools: React.js, Node.js, Express.js, Tailwind CSS, MySQL, MongoDB, Jupyter Notebook, Framer Motion

Cloud/DevOps: Basic understanding of AWS (EC2, S3, IAM), Linux commands, Networking (DNS, HTTP, TCP/IP), Docker, Kubernetes.

Data Science & ML: Hands-on experience with Pandas and NumPy for data manipulation, Scikit-learn for machine learning models (Regression, Random Forest), feature engineering, and data visualization using Matplotlib and Seaborn.

About Me

- Responsible, organized, and hardworking individual passionate about technology, innovation, and problem-solving.
- **Soft Skills:** Communication, Critical Thinking, Analytical Problem Solving
- **Languages:** English (Fluent), Hindi (Fluent), Kannada (Native)
